

IN THE DRAWINGS

By the present Response, Applicant has provided red-lined mark-up copies of Figures 3, 4, 5, and 10 to correct minor errors in these drawings. Applicant asserts that no new matter is added. Each of these corrected drawings sheets is labeled with “REPLACEMENT SHEET.”

First, with regard to Figures 3 and 5, an electrical connection between transistor 324 and 524 and column rapid discharge 333, 533, respectively, were missing on Column 0. The annotated Figures 3 and 5 on Replacement Drawing Sheets 2/19 and 4/19, respectively, have been amended to show this connection and replace the originally filed Figures 3 and 5.

Second, the originally filed Figure 4 was missing the electrical connection reference numeral “435” referred to in the Specification. The annotated Figure 4 on Replacement Drawing Sheet 3/19 is amended to include this missing reference number and replaces the originally filed Figure 4. *See* Specification, page 13, lines 17-18.

Further, Applicant notes that the originally filed Figure 10 has an incorrect label. The annotated Figure 10 on Replacement Drawing Sheet 7/19 has been amended by replacing the word “Charge” with “Discharge” and replaces Figure 10 as originally filed. *See* Specification, Pg. 16. lines 18-19.
